

TASC has our clients covered with a liability protection package unique to our industry.

Our Hold Harmless clause is included in each Service Agreement for any of our compliance and continuation offerings for a total aggregate liability of one million dollars.

TASC pioneered the course to stand behind our services with a Hold Harmless agreement that insures our clients when utilizing our Continuation/Compliance service offerings. It's not often a client is backed by a one million dollar guarantee, which puts TASC in the forefront as a benefits partner.

How the Hold Harmless Works

- If a client is financially impacted by TASC's failure to perform, or by mistakes made in the administration of their Continuation/Compliance service offering, they are covered up to a total of one million dollars.
- The one million dollar limit is an aggregate total of all losses for any TASC failure to perform related to the Continuation/Compliance service aggregate tool.
- The client is protected in the event our service offerings are deemed "not adequate" in the eyes of governing bodies.
